Junior Software Developer

Location : Ankara, Türkiye.

Hello, I'm İsra Feza AĞLAMİŞ. I was born in 2002. After completing high school with a quite good average in science, I started to reside in Malatya, where I received my university education. I am a person who prioritizes functionality and tends to analyze environments and situations. Besides, I am a very calm and compliant person. I believe that the professional steps taken at an early age provide advantages, and in 2021, I provided support to the testing process alongside the software team for an e-commerce website's development. I determine the steps I will take in my career based on this thought.

Communities : [Patika dev. - Kodluyoruz Graduates Club](#)

Strong points: High concentration, Teamwork and communication skills, analytical approach, practical solutions, planned and organized working style, result oriented approach.

Specialties: Java, Spring Boot, Javascript, React(Basic), Kotlin, Figma, Bootstrap, Oop
